Dr. Ju-Long Chen

President

Chihlee University of Technology, Taiwan

Warmest greetings and best regards from University of Social Sciences and Humanities, Viet Nam National University Ho Chi Minh City (USSH-VNUHCM).

First and foremost, the USSH-VNUHCM presents its compliments to your esteemed University and wishes to express our sincere gratitude for your close cooperation and invaluable support in organizing the Vietnamese Language Proficiency Test for learners in Taiwan.

As previously planned, the Vietnamese Language Proficiency Test was scheduled to be administered at Chihlee University of Technology (CLUT) in November 2026. However, the regulatory framework and provisions issued by the Ministry of Education and Training of Vietnam regarding the organization of Vietnamese Language Proficiency Test abroad are currently undergoing revisions and adjustments.

Under current regulations, Vietnamese Language Proficiency Test administered overseas must be conducted via a computer-based testing (CBT) platform. Consequently, our University requires additional time to refine, adjust, and finalize the official Testing Project in full compliance with the new regulatory standards. Simultaneously, close coordination with relevant units is required to establish and complete the computer-based testing system at the hosting facilities of your esteemed Universities.

For the aforementioned reasons, we deeply regret to inform you of the temporary postponement of the Vietnamese Language Proficiency Test originally scheduled for November 2026 at Chihlee University of Technology (CLUT).

USSH-VNUHCM greatly values the goodwill, friendship, and steadfast partnership that CLUT have extended to us, and we earnestly seek your understanding regarding this necessary schedule adjustment. Our University is actively expediting all essential procedures to satisfy the new regulatory requirements, and we will work in close coordination with your CLUT in preparing the facilities and technical infrastructure dedicated to the examination.

Depending on the progress of completing the administrative procedures, the official proposal, and the readiness of the computer-based testing system, we tentatively project and will make every effort to conduct the examination at the earliest in March 2027. The official examination schedule will be formally communicated to and coordinated with your Universities as soon as all prerequisite conditions are satisfied.

We earnestly look forward to receiving your continued collaboration and support in the coming period, ensuring that the administration of the Vietnamese Language Proficiency Test in Taiwan is successfully implemented, fully compliant with applicable regulations, and effectively meets the needs of candidates.

Yours sincerely, 

Dr. Le Hoang Dung
Vice President
University of Social Sciences and Humanities
Viet Nam National University Ho Chi Minh City
